

ROYAL INSTITUTE OF NAVIGATION

SOLENT BRANCH

Evening Lecture

Thurs 22nd February 1830 for 1900.

Ordnance Survey, Adanac Drive, Nursling, SO16 0AS

“How the human brain makes a map of space.”

Professor Kate Jeffrey – Chair of RIN Cognav SIG

Why does it work better in some people than in others? When people think about where they want to go, they call to mind a “mental map”. Where is this map in the brain and how is it made?

In her talk the speaker the speaker will explain some of the research which has taken place in recent years and shed light on these questions, and also reveal the surprising discovery that our map and memory are closely intertwined.

There is no charge for attendance and members' guests will be welcome. Please note the timing is 1830 for signing in etc for the start at 1900. Please carry photo ID.

Before the meeting some members might like to go to the very nearby pub, the Walnut **Tree Farm, Adanac Drive, Nursling, SO16 0AU arriving at around 1715. They do a carvery meal for circa £7-00. Pay them directly when ordering.**

On line prior booking will be required. To book visit the events section of www.rin.org.uk and scroll to 22nd Feb 18 in order to register using Eventbrite.
