

Royal Institute of Navigation

Science Technology Practice

Media Invite

NAV10 Conference and Exhibition
30 November – 02 December 2010
Church House, Westminster, London SW1P 3NZ

The Royal Institute of Navigation's NAV series of conferences are always the big event of any given year in European navigation circles. This year, the three-day event at Church House has something for everyone covering Land, Air, Sea and Space navigation stories.

Keynote Speakers include:

Captain Gurpreet Singhota, Deputy Director of the International Maritime Organization, on the IMO's role in the evolution of marine navigation.

Professor Gunther Hein, Head of Galileo Operations and Evolution, European Space Agency – on the evolution of multi-constellation global navigation satellite systems (GNSS – GPS, Galileo, GLONASS etc).

Professor Jonathan Raper, founder/Managing Director, Placer Ltd – On the future of Location-Based Services.

David Patraiko, Director of Projects at the Nautical Institute, on the decision making process in maritime navigation.

Mitch Narins of the US Federal Aviation Administration, on robust alternatives to GNSS.

Professor Terry Moore, University of Nottingham – on GNSS Status and Modernisation.

There are plenty of other fascinating topics on discussion over three days – see the attached programme for full details.

And of course, the best thing about this navigation copy-fest is that for the brothers and sisters of the media, entry is free.

To join us at this spectacular event, simply contact RIN Press Officer **Tony Fyler** on 020 7591 3133 or at editor@rin.org.uk to let us know you're coming.
